

The Exegy Ticker Plant Exchange Feeds

October 2008

The Exegy Ticker Plant currently offers access to 25 exchanges and trading feeds across North America and Europe. The Exegy Ticker Plant is able to consume all of these sources at current market rates on one single 4U server, with massive headroom to spare.

First introduced to the high frequency trading community in March 2007, the Exegy Ticker Plant continues to add exchange and trading feeds based on customer needs. Ingesting and distributing Level 1, complete Level 2, futures and options data, the Exegy Ticker Plant brings together all the key asset classes for arbitrage trading in one, single appliance.

The Exegy Operations team monitors the incoming feeds and carries out maintenance, enhancements and exchange mandated upgrades as part of the Exegy Managed Service Plan.

For more information, contact us at sales@exegy.com or 877.247.5534.
