

For Immediate Release:

Exegy Inc. Deploys Ultra-Low Latency Exegy Ticker Plant on the Options PIPE® Platform

NEW YORK — Feb. 1, 2010 — Options IT, a leading provider of high-performance technology Infrastructure-as-a-Service, ultra-low latency market data and connectivity for buy-side and sell-side firms, today announced Exegy Incorporated, the ultra-high performance market data appliance company, has deployed its ultra-low latency Exegy Ticker Plant on the Options PIPE platform.

Both buy-side and sell-side firms may now leverage the Exegy Ticker Plant as a fully optimized and managed proximity-hosting service powered by the Options PIPE platform. Deploying the Exegy Ticker Plant on the Options PIPE platform provides clients with a high-performance ticker plant capability that is fully redundant and quickly deployed in a cost efficient manner.

The Option PIPE platform is a fully optimized and managed, software-vendor-neutral, global technology infrastructure, providing clients with the efficiencies of a hosted technology service delivered with the scalability, strength and security of an enterprise solution. The hosted Exegy Ticker Plant is the first hardware-accelerated market data appliance built from the ground up to ensure high-frequency traders continuously have the best view of the electronic markets.

“We’re delighted to work with Exegy to provide a managed hosting environment for Options PIPE clients who want to leverage the Exegy Ticker Plant,” said Nigel Kneafsey, CEO of Options IT. ““As the race to reduce latency continues to build momentum, our clients are increasingly seeking out market data applications like Exegy’s that provide a competitive advantage.”

Added Jim O’Donnell, Chairman and CEO of Exegy, “As market data rates continue to explode, reducing data processing latency becomes increasingly important to the success of high-frequency trading strategies. We’re pleased to add Options IT as one of our technology providers for our mutual clients.”

###

About Exegy, Inc. (www.exegy.com)

Exegy provides ultra-high performance hardware-accelerated computing appliances that efficiently process and enrich market data for the world's leading financial organizations. Exegy's unique market data products respond to financial organizations' growing demands for low latency, reduced cost of ownership, and flexibility. Exegy's products are compatible with leading operating systems and interconnects.

About Options IT (www.options-it.com):

Founded in 1993, Options IT is a global provider of high-performance technology Infrastructure-as-a-Service, managed hosting, ultra-low latency market data and connectivity for hedge funds, proprietary trading shops, investment banks and brokerages. Combining innovative technology solutions with highly experienced technology management and support staff, Options IT provides clients with a total technology infrastructure solution via the Options PIPE platform, delivering the efficiencies of a host technology service with the scalability, strength and security of an enterprise solution. With offices across North America, Europe and Asia, Options IT provides solutions to more than 120 clients globally.
